

# Preliminary Assessment Report

## Project 001175-20PA, 632 W BARRETT ST

---

**Assessment Completed:** 3/20/2020

**Project Description:** Final site of multi-parcel development with 31 total units. Previous PAR's issued in conjunction with site: -000861-19PA, -001522-18PA-

**Primary Applicant:** [Steve Bull](#)

This report lists the results of a preliminary assessment of your project requirements by various city departments. It's based on the project characteristics described on your site plan and preliminary application form. If your project required a pre-application site visit (PASV), the results of that site visit are also included. The goal of this report is to help you create a complete submittal package and reduce the need for corrections once your application has been submitted.

### Next Steps

1. Review the requirements in this report and contact the staff members listed below with questions.
2. If a street improvement plan is required, develop and submit it to the Seattle Department of Transportation (SDOT). **The Seattle Department of Construction and Inspections (SDCI) will not accept your permit application until your street improvement plan is approved as 60% complete by SDOT. See [SDOT Client Assistance Memo 2213](#) for guidance about the 60% complete approval process.**
3. Schedule an appointment for permit application intake with SDCI.

### Questions About This Report

If you have questions about the information in this report, contact the appropriate city staff member for each section.

#### SDCI Drainage Requirements

## Other Resources

- General questions about the permit process: Contact the SDCI Applicant Services Center (ASC) at 206-684-8850.
- User-friendly guides to city permitting processes: [SDCI](#) and [SDOT](#).
- [Detailed zoning information](#).
- Visit our [permit type pages](#) for step-by-step instructions and forms for preparing your application and plans for review.

## Requirements

### SDCI Drainage Requirements

The following requirements are based on the current stormwater and side sewer codes.

**\*\*The new 2016 Stormwater Code becomes effective on January 1, 2016. Projects with an accepted application (successful SDCI permit intake) date after December 31, 2015 will be reviewed under the new code. The drainage requirements indicated below are based on the 2016 Stormwater Code. If your project will be submitted prior to January 1, 2016, please contact the SDCI Drainage Reviewer to determine drainage requirements.\*\***

#### Existing Public Drainage Infrastructure

Combined sewer main location: **5th Ave W**

Combined sewer main size: **12-inch**

#### Drainage

Infiltration Investigation Required: **No**

This project is in an area that does not require Infiltration Investigation/Evaluation to meet On-site Stormwater Management, Flow Control, or Water Quality requirements.

#### Project Type and Drainage Basin

The storm drainage point of discharge ([SMC 22.805.020](#)) is located at: **Public Combined Sewer Main**

Project Type: **Parcel-based**

Drainage Basin: **Public combined sewer**

#### Drainage Control Compliance

Drainage Review Required: **Yes**

Drainage Control Review is required for this project per [SMC 22.807.020](#). Submit a completed [Standard Construction Stormwater Control and Post Construction Soil Management \(CSC/SOIL\) Plan](#) and a completed [Standard Drainage and Wastewater Control \(DWC\) Plan](#) including the **Site and Drainage Control Summary** from [On-site Stormwater Management Calculator](#).

Note: For projects with 5,000 square feet or more of new plus replaced hard surface, a comprehensive drainage control plan, construction stormwater control plan, soil amendment plan, and drainage report shall be prepared by a licensed engineer.

Soil Amendment Required: **Yes**

All new, replaced, and disturbed topsoil shall be amended with organic matter per rules promulgated by the Director prior to completion of the project to improve onsite management of drainage water flow and water quality per [SMC 22.805.030.A](#), [SMC 22.805.040.A](#), or [SMC 22.805.050.A](#). Complete the **Post Construction Soil Management Plan** on the [Standard CSC/SOIL Plan](#).

On-site Stormwater Management Required: **Yes**

Parcel-based projects with 7,000 square feet or more of land disturbing activity, 1,500 square feet or more of new plus replaced hard surface or, if on a lot or parcel created or reduced in size on or after January 1, 2016, 750 square feet or more of new plus replaced hard surface, must implement **On-site Stormwater Management** (infiltration, dispersion, bioretention, green roofs, permeable pavement, rainwater harvesting, etc.) to manage runoff from all hard surfaces on-site per SMC 22.805.050.B. and Director's Rule 21-2015.

Flow control standards must be first met by utilizing **On-site Stormwater Management** to the maximum extent feasible. Additional flow control measures shall be installed if the flow control standard cannot be met solely using On-site Stormwater Management BMP's.

Submit an [On-site Stormwater Management Calculator](#) and show the On-site Stormwater Management BMP's and surface designation on the [Standard Drainage and Wastewater Control Plan](#).

#### Flow Control Required: **Peak Flow Control Standard**

This project site discharges to a **Public Combined Sewer** (SMC 805.050.C.5). Based upon the information provided on the Preliminary Application Form pertaining to land disturbing activity and existing and proposed hard surfacing, this project shall provide flow control meeting the **Peak Flow Control Standard** per SMC 22.805.080.B.4. since the total New Plus Replaced Hard Surface area in this project will be 10,000 square feet or more. The post-development peak flow with a 4% annual probability (25-year recurrence flow) shall not exceed 0.4 cubic feet per second per acre. Additionally, the peak flow with a 50% annual probability (2-year recurrence flow) shall not exceed 0.15 cubic feet per second per acre.

Stormwater modeling using an approved continuous runoff model by a licensed Civil Engineer is required for projects with 10,000 sf or more of new plus replaced hard surface area.

#### **Water Quality**

No requirements

#### **Wastewater**

The wastewater point of discharge (SMC 21.16.070.B) is located at **Public Combine Sewer.**

#### **An extension of the public sanitary sewer is required (SMC 21.16.260.B). Extension from 5th Ave W**

This main extension may be eligible to enter into a Latecomer Agreement. Latecomer agreements allow a property owner who has installed water or sewer utility system improvements to recover a portion of the costs of those improvements from other property owners who later connect to the improvements. For more information, please visit our website at

[http://www.seattle.gov/util/Engineering/Consulting\\_Resources/LatecomerAgreements/index.htm](http://www.seattle.gov/util/Engineering/Consulting_Resources/LatecomerAgreements/index.htm) or call SPU's Development Services Office at 206-684-3333.

**King County Capacity Charge:** All homeowners and building owners in King County's service area (i.e. all Seattle Public Utility Combined and Sanitary Sewers) whose home or building was connected, reconnected or had a new service established to a sewage facility served by King County on or after Feb. 1, 1990 must pay a **King County Capacity Charge**. (King County Code No. 28.84.050.0.1)

Submit completed and signed King County Sewer Capacity Charge form/s with the building permit submittal. These forms are available on the SDCI Stormwater Code website under Forms and Documents.

#### **Permanent and Temporary Dewatering**

**Approved Point of Discharge for Sub-surface Drainage** (e.g. footing drains, sub-surface wall drains, underslab drains, etc.): **Public Combined Sewer Main.**

### **SDCI Land Use Code Requirements**

## Street Requirements

Based on the scope of the proposed project, the following street improvements are required per Chapter 23.53 of the Seattle Municipal Code. Please review Right-of-Way Improvements Manual for design criteria (<http://www.seattle.gov/transportation/rowmanual/manual/>). Show required street improvements on your "enhanced site plan" at SDCI permit application intake. If an SDOT Street Improvement Plan (SIP) is required, please list SDOT project number and SDOT contact name on the enhanced site plan. Street Improvement Plans must be accepted by SDOT prior to SDCI permit application intake.

### W BARRETT ST

Pavement could be required to be installed or widened in the portion of right-of-way abutting this lot.

A concrete sidewalk and curb will be required to be installed in the portion of right-of-way abutting this lot.

Drainage may be required to be installed in the portion of right-of-way abutting this lot. Please contact [SDOT](#) for more information.

Grading to future ROW grade.

New structures must be designed to accommodate right-of-way improvements.

This project qualifies for a reduced street improvement, a no-protest agreement is required. This form can be found [here](#).

## Pre-Application Site Visit (PASV) Requirements

PASV report requirements may be subject to additions, changes, or modifications by the department. The purpose of the report is to alert the applicant that there may be unusual or complex site conditions that trigger requirements from the department regarding this project. **The applicant is responsible for providing all required documents at the intake appointment.** If you have questions about this report or the PASV process, please contact the SDCI Site Development Team at (206) 684-8860.

**Note:** Any project application associated with the development site can utilize the results from this PASV if the application is accepted by SDCI within 24 months of the above inspection date. After 24 months, the applicant must apply for another PASV. No extensions will be granted.

## ECA Mapping Unit and Type

This project site appears to include the following ECAs and/or buffers:

Steep slope

## Earth Disturbance

If excavation has the potential to encroach on adjacent property in order to facilitate construction activity, please provide documentation of consent from the adjacent property owner. Show area of proposed encroachment on the submitted drawings and detailed cross-sections.

If temporary cuts greater than 1h:1v will be required in order to facilitate construction activity, please provide a geotechnical engineer's verification that soil conditions allow cuts to stand unsupported. Include detailed cross sections.

Please show all existing and proposed retaining walls/rockeries and the exposed height.

If shoring will be required, please provide submittals by geotechnical and structural engineers and show the proposed system on the submitted drawings. Include detailed cross sections.

## Existing ROW Conditions

### W BARRETT ST

Street conditions:

Asphalt paving

Visible pavement width is: 24 ft

Curb conditions:

No curb adjacent to site

A storm inlet does not appear to be located <600 ft from the site and prior to crossing a public right of way.

## Potential Impacts to Seattle Parks Property

No parks property in vicinity

## Tree Protection

Existing trees appear to be shown accurately on the site plan

## Construction Stormwater Control

All projects with earth disturbance, regardless of size, require temporary and permanent stormwater control in accordance with the Construction Stormwater Control (CSC) Technical Requirements Manual (Director's Rule 17-2017, Volume 2, [Storm Water Manual Vols. 1-5](#)).

**Show the following on the [Construction Stormwater Control and Soil Amendment Standard Plan](#):**

Place compost socks, compost berms, filter fabric fencing, straw bales, straw wattles, or other approved perimeter control BMPs to eliminate construction stormwater runoff.

Show the location of a stabilized construction access to the site; show methods to eliminate uncontrolled conveyance of mud and dirt into the right of way (ROW).

Cover bare soil with compost blankets, straw, mulch, matting, or other approved equal to control construction stormwater runoff.

Cover stockpiles and bare slopes with compost blankets, tarps, matting or other approved equal to control construction stormwater runoff.

A First Ground Disturbance inspection is required before any ground disturbance related to this permit, including demolition, tree cutting, clearing, grubbing, and grading. After your permit is issued, schedule an inspection by calling (206) 684-8900 or [online](#).

## Inspectors Notes

Include earthwork calculations with submittal. Indicate total cut quantity and total fill/backfill quantity.

## Modifications to ECA Submittal Requirements

### Standard Submittal Requirements for Projects in an ECA

Submit a geotechnical report with the permit intake submittal package. Geotechnical report must be signed and stamped by a geotechnical engineer licensed in the State of Washington per [SMC 22.170.070](#), [SMC 25.09](#), and Director's Rule 5-2016, [General Duties & Responsibilities of Geotechnical Engineers](#).

Provide a topographic survey with 2-foot contours on and within 25-feet of the property, stamped by a licensed land surveyor (see [SMC 25.09.330A](#))

Delineate the clearing limits on the site plan

Provide a vegetation restoration plan per [SMC 25.09.320](#), [Tip 331](#) and [Tip 331A](#). **Prior to any vegetation removal in the critical area, review, approval, and a preconstruction meeting is required**

Delineate the steep slope critical area on a site plan based on the survey (per [SMC 25.09.020 A3b\(5\)](#)).

Provide area calculations for the steep slope delineation.

Show the steep slope buffer. Generally, the buffer is 15-feet from the top and/or toe of the slope

Construction activity area appears to be within the steep slope critical area and/or its associated buffer. A steep slope variance may be required (see [SMC 25.09.180E.1](#))

## Seattle City Light Requirements

### Easements

SCL power easement is required. Property survey may be required at project's expense. Short subdivision #3036095-LU has not been approved by SCL and SDCI or recorded with King County.

SCL blanket power easement over the entire parent parcel may be required. Property survey may be required at project's expense. If this is a unit lot subdivision, a blanket easement is needed.

Other requirements: The development site(s) must first be established to determine electrical service and easement requirements. Separate sites require separate services. Underground electrical services to the sites will likely be required which means an underground streetcrossing will be needed. Depending on total electrical load, transformers on private property may be needed. An easement area sufficient in width to accommodate underground infrastructure is required. Underground electrical facilities/conductors require separation from other utilities and structures. Review City Light Construction Standard 0214.00. Please contact your Electrical Service Representative well in advance of construction to discuss City Light's requirements for electrical service connection and to confirm a viable easement location and dimension.

### Notes to Applicant

For future property development, please contact the Electrical Service Representative for your area several months before new service is required to determine your electric service design, service location and what kind of service is available at the building site. The design of the distribution system to serve the site shall be within the sole discretion of City Light. An Application for Electrical Service must be submitted to Seattle City Light. Your Electrical Service Representative is: Shana Kesselring, 206-684-0791, [shana.kesselring@seattle.gov](mailto:shana.kesselring@seattle.gov). Be advised that it is the applicant's responsibility to seek guidance from SCL.

Failure to contact City Light in advance to plan utilities for the development site(s) may result in significant delays for review and costly service connections.

## **SDOT Requirements**

The City of Seattle's Right-of-Way Improvements Manual (ROWIM) and SDOT's Street & Sidewalk Pavement Opening and Restoration (PORR) Director's Rule 2004-02 may be accessed from SDOT's Street Use website at: [http://www.seattle.gov/transportation/stuse\\_docs.htm](http://www.seattle.gov/transportation/stuse_docs.htm). Whenever possible, specific reference notation for these two design documents is noted next to the design characteristics below. Be advised that these specific section and chapter references are provided as preliminary guidance only and are not comprehensive in scope.

### **SDOT Permitting Information**

SDOT Plan Requirements: Engineered plan

A 60% complete street improvement plan (SIP) must be approved by SDOT prior to your SDCI construction intake appointment. SIP Design Guidance is required for 60% complete SIP approval; apply early. Please visit SDOT's Street Use website at: [http://www.seattle.gov/transportation/stuse\\_sip.htm](http://www.seattle.gov/transportation/stuse_sip.htm) to obtain SDOT Client Assistance Memos (CAMs) and application materials to assist in developing your street improvement plan (SIP).

### **Existing conditions review**

The city's [Right-of-Way Improvements Manual](#) identifies recommended curb-to-curb, planting strip, and sidewalk widths by street type. The street types fronting this site are: Neighborhood Yield Street

Consider pedestrian and bicycle accessibility and safety enhancements along the existing [Safe Routes to School](#) walking route.

### **Street Improvement Requirements**

#### **W BARRETT ST**

New street trees: Street trees shall be installed between sidewalk and curb in the planting strip or tree pits, per Streets Illustrated standards (see section 3.6) unless otherwise approved by the SDOT Urban Forestry Landscape Architect's Office. Street trees must be planted between October 1st and April 30th unless installed with automatic irrigation. Property owners are responsible for the ongoing maintenance of street trees, per Director's Rule 03-14 Street Tree Manual. **To apply for an SDOT Urban Forestry Construction Permit for tree planting, e-mail your request to SDOT Urban Forestry at DOT\_LA@seattle.gov and include the project address and SDCI project number in the subject line.**

Roadway Widening: See Seattle Right of Way Improvements Manual (ROWIM) and the City's Standard Plans and Specifications.

All improvements on private property must accommodate the right of way elevation at the property line using the standard cross-section in the ROWIM. Right of way grading may be required to provide vehicular and pedestrian access that meets the standard cross-section.

New/replacement sidewalk: See Seattle Right of Way Improvements Manual (ROWIM) as well as the City of Seattle Standard Plan 420, 421 and 422.

New/Replacement Curb: See Seattle Right of Way Improvements Manual (ROWIM) and the City of Seattle Standard Plan 410.

New/replacement driveway: If there is a concrete curb in front of the project, the Street Use curb cut permit is issued by SDCI. If there is not a concrete curb in front of the project, a permit must be issued by Street Use. Refer to Standard Plan 430 for driveway curb cut standards.

Street drainage collection may be required when street improvements are installed. See Seattle Right of Way Improvements Manual (ROWIM) section 4.17.

### **Construction management**

SDOT strongly recommends identifying all telecom needs for the building and tenants and installing connections prior to final street improvement restoration. Often, tenants take possession of a space and request telecommunication service connections requiring excavation through new sidewalk and street surfaces, increasing the cost of service and disrupting the public.

## **SPU Requirements**

## Flow Control Compliance

Soil Amendment. Retain and protect undisturbed soil in areas not being developed, and prior to completion of the project, amend all new, replaced, and disturbed topsoil (including construction lay-down areas) with organic matter to the extent required by and in compliance with the rules promulgated by the Director.

On-site Stormwater Management. All trail and sidewalk projects with 2,000 square feet or more of new plus replaced hard surface or 7,000 square feet or more of land disturbing activity shall meet the Minimum Requirements for On-site Stormwater Management contained in Section 22.805.070, to the extent allowed by law.

## Water Availability

If required, you will receive a separate water availability certificate from SPU outlining any water requirements.

## SOLID WASTE

SPU review of solid waste storage and service plans is **required** for:

- all multifamily, mixed-use and townhouse developments greater than 5 units;
- all commercial and industrial buildings;
- buildings using compactors;
- buildings seeking a storage or access variance from land use code.

Please review the land use and solid waste code for solid waste and the guidelines found in **CAM 1301: Solid Waste Information for Developers**

(<http://www.seattle.gov/util/ForBusinesses/Construction/SolidWasteForDevelopers/index.htm>). For the property types listed above, please submit the **Checklist for Developers** to Angela Wallis at [angela.wallis@seattle.gov](mailto:angela.wallis@seattle.gov), or call: (206) 684-4166 with questions.

If the scope of your proposed project changes before your SDCI intake appointment or SDOT street improvement plan application, the requirements in this report may change. If there are municipal code and ordinance changes before our SDCI intake appointment, the project must meet the new code requirements. Additional street improvement requirements may be triggered if a permit application for a development project on adjacent property is also undergoing review.

Please be aware that all persons or companies working within the City limits, including all contractors, subcontractors, permit expeditors and other service providers are required to possess a valid City of Seattle business license. This license is required in addition to any other licenses required by the State of Washington, such as a contractors' license or state business license. For more information about City of Seattle business licenses, please contact inspector Michale Crooks at 206-684-8871, [Michale.Crooks@seattle.gov](mailto:Michale.Crooks@seattle.gov), or visit the [Licensing and Tax Administration Division website](#).
